

Outside Animal Watching

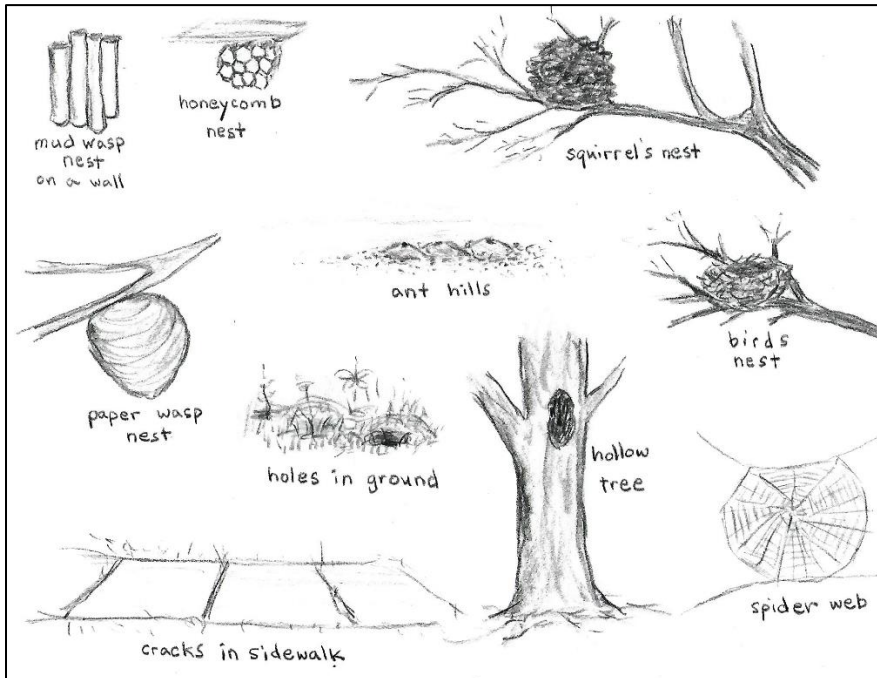

Anita and her family showed respect for and caring about the animals that lived near their home. They always looked closely to observe the amazing actions that animals did. They were careful to not disturb the animals. **They never touched the animals' homes.** 📱

Anita, with her Mom's help, made a special sheet to use when you and your family do Outside Animal Watching. Have fun getting to know your animal neighbors and their homes! *After exploring, your family can share what they discovered.*

You can draw your own animal homes if you cannot print Anita's sheet.

Outside Animal Watching

1. Pick one animal to watch. Tell what you find out about this animal:
 - a. How does it move: flies, runs/walks, swims, wriggles?
 - b. How many legs and/or wings does it have?
 - c. What does it eat?
 - d. What animal is it?
 - e. In what home does it live?

2. What is one interesting thing you discovered about your animal?
3. What can you and your family do to show you care about this animal and its home? *Remember there are few things better than leaving the animal and its home alone.*
